

ITA0520 – Computer Vision For Image Analysis

Name: Haresh Kumar N L (192425009)

Experiment 29:

Implement an Eye detection algorithm using Open CV to detect and locate human eyes in the images.

Code:

```
import cv2

i = cv2.imread("Person.jpg")

g = cv2.cvtColor(i, cv2.COLOR_BGR2GRAY)

ec = cv2.CascadeClassifier(cv2.data.harcascades +
                           "haarcascade_eye.xml")

e = ec.detectMultiScale(g, 1.3, 5)

for (x, y, w, h) in e:
    cv2.rectangle(i, (x, y), (x+w, y+h), (255, 0, 0), 2)

cv2.imshow("Eye Detection", i)

cv2.waitKey(0)

cv2.destroyAllWindows()
```

Input:

Output:
