

ITA0520 – Computer Vision For Image Analysis

Name: Haresh Kumar N L (192425009)

Experiment 32:

Write a Python function to create a white image size entered by the user and then create 4 boxes of Black, Blue, Green and Red respectively on each corner of the image. The size of the colored boxes should be 1/10th the size of the image.

Code:

```
import cv2
import numpy as np
def b():
    w = int(input("Enter width: "))
    h = int(input("Enter height: "))
    i = np.ones((h, w, 3), dtype=np.uint8) * 255
    bw = w // 10
    bh = h // 10
    i[0:bh, 0:bw] = (0, 0, 0)
    i[0:bh, w-bw:w] = (255, 0, 0)
    i[h-bh:h, 0:bw] = (0, 255, 0)
    i[h-bh:h, w-bw:w] = (0, 0, 255)
    cv2.imshow("4 Corner Boxes", i)
    cv2.waitKey(0)
    cv2.destroyAllWindows()
b()
```

Output:
